

# Caring for Carcinoid Foundation Research Road Map

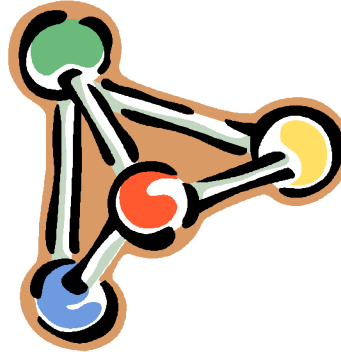

## Step 1

### Genetic

## Step 2

### Molecular biology

## Step 3

### Clinical

## Goals

- Determine the genetic causes of carcinoid
- Define how carcinoid spreads in the body
- Develop gene-targeted drugs to cure carcinoid

## Research

- Proteomic
  - Analyze the proteins of carcinoid tumors
- Genomic
  - Analyze the DNA of carcinoid tumors
- Cellular pathways
  - Map the pathways of carcinoid cell growth and proliferation
- Drug screening
  - Screen potential drugs that target carcinoid
- Drug approval
  - Approve safe, effective drugs based on trials
